

# CARA, European Cluster for Mobility solutions

## Our Identity :

French Cluster based in Auvergne-Rhône-Alpes, CARA comprises over 200 members, including manufacturers, transports operators, universities, research and education centers.

## Our Mission :

Uniting and driving the network, as well as skills, expertise, performance and collective intelligence.

Represent the regional automotive and industrial vehicles sector

Support the transformation of passengers and goods transport systems in urban environments

## Our Vision

Being the leading French cluster in Europe addressing the global challenges of urban mobility and vehicles of tomorrow.

## Our Actions

From the drawing board through to market launch, CARA implements collective actions : research and innovation projects, pilots in real life situation, and measures for the economic and industrial development of its members.

## Our expectations :

international network, the level of maturity of H<sup>2</sup> technology in Japan, its real applications, its business models and its members.
