

Olivier Ginepro, Economic counsellor
Deputy Chief of the Regional Economic Department
Seminar on France's Climate Plan, on November 20th, 2017

France's new Climate Plan

The French Climate Plan is composed of 23 axes detailing the French government's main priorities in the field of climate and environment

The objectives of the Climate Plan:

- Further and promote the French initiatives against climate change
- Define clear and staggered goals aiming at realizing a low-carbon and environmental friendly society
- Mobilize every sectors impacting climate change: energy, finance, agriculture and transport industry
- Highlight French actions on the international stage and help initiate a global commitment toward a low-carbon future for all

A widespread mobilization at the center of the Climate Plan

France's prime objective is to accelerate the implementation of the Paris agreement
at a national, European and international scale through
a widespread mobilization of all the actors affected by climate change

Mobilization of all actors at every level

- **Citizens**
- **Private companies**
- **Administrations**
- **Local governments**
- **Associations**
- **Research institutes**

Mobilization of all Ministries

- All the French Ministries will be involved in the struggle against climate change, especially:
- The Ministry for the Ecological and Inclusive Transition (energy, climate, transport, construction)
 - The Ministry of Economy and Finance
 - The Ministry of agriculture and Food

Mobilization of all States on a global scale

- It implies the mobilization of all governments and all the non-governmental organizations (NGO, international entities)
- Adoption of the Global Pact for the Environment
- Objective set to increase the number of ratifications of the Paris agreement

A joint effort from all the sectors impacting climate change : energy, mobility, finance and agriculture

The mitigation of climate change entails :

A decarbonation of the energy mix

Promote and develop renewable energies, ban hydrocarbon exploration permits, lower the share of nuclear in the energy mix, establish a National Plan for climate change adaptation, define a new national priority: thermal renovation of older buildings

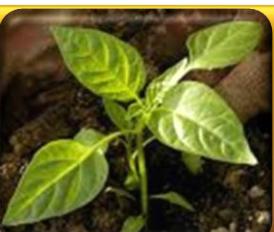

A clean mobility

End the sales of petrol-powered cars and diesel cars for a clean and sustainable mobility, establish a transition premium scheme and a “bonus-malus” system, create a Fund for Sustainable Mobility will be created to support the development of recharging infrastructures and innovative initiatives

A further development of green finance

Turn Paris into an international platform for green finance, creation of reference certifications, support countries eager to launch their own green bonds, offer the support from BPI and Caisse des Dépôts to establish a new investment fund in the field of green infrastructures and Eco-technologies

A green agriculture

End the importation of products causing deforestation, sustainable management of forest resources, reduce the GHG emissions by using the sequestration of carbon in the soil, protect the marine and terrestrial ecosystems, organize calls for projects aiming at developing solutions and technologies to preserve the nature

The One Planet Summit, on December 12th, 2017

In order to celebrate the 2nd anniversary of the Paris Agreement, the French government decided to organize an international summit on climate, with the UN and the World Bank

The objectives of the One Planet Summit:

Emmanuel Macron
