

Green finance : the way forward – Implementing the French-Swedish partnership for innovation and green solutions

Come and join us as we explore the cutting edge of green finance !

In recent years, greening the financial systems has become a priority in order to power the transition towards low-carbon and climate-resilient economies and to achieve the Paris Agreement goals. With around €100 trillion of financial assets contributing to finance the real economy, the financial sector represents a significant lever towards green and sustainable investment.

France and Sweden have already taken the lead in this field today, through the involvement of both private and public stakeholders, and implemented decisive actions. Green finance is one of the four key areas identified in the [French-Swedish strategic partnership for innovation and green solutions](#) signed on 17 November 2017 in Göteborg by the Swedish Prime Minister Stefan Löfven and the President of the French Republic Emmanuel Macron.

As a concrete step towards implementing the roadmap of the French- Swedish partnership for innovation and green solutions, **Crédit Agricole CIB and SEB organize, with the support of the Regional Economic Department of the French Embassy in Sweden, a Conference dedicated to « Green Finance – the way forward ».**

This half-day event will take place in SEB premises (Solna, Stjärntorget 4) on 29 May, from 8h30 to 13h. Registration by invitation only.

Among featured high level speakers:

- Per Bolund, Minister for Financial Markets and Consumer Protection
- Marcus Wallenberg, Chairman, SEB
- Xavier Musca, Deputy CEO, Crédit Agricole SA
