REGIONAL

KENYA OFFERS ITS SUPPORT FOR COMOROS' KARTHALA GEOTHERMAL PROJECT

At the 11th African Rift Geothermal Conference (ARGeo-C11) in Moroni on 19–24 October, Kenya's state-owned Geothermal Development Company (GDC) offered its support for the Comoros' geothermal ambitions at Mount Karthala, the volcano on Grande Comore. Dr George Muia, GDC's General Manager for Business Development, recalled that GDC had prepared the country's geothermal business plan, and offered to share Kenya's experience, including direct uses such as fish farming and greenhouses. Geothermal power uses underground heat to produce steam that drives turbines. Launched in July with support from the African Development Bank (AfDB), the African Union and the United Nations Development Programme (UNDP), the Karthala project plans three exploration wells, drilled to confirm the resource, and a first 15 MW plant, out of an estimated 45 MW potential. It is valued at over 33.5 million units of account (the AfDB's accounting currency), about USD 45M. Recent surveys point to promising reservoir temperatures of 275–315°C.

EU–UGANDA FORUM PUTS RENEWABLE ENERGY IN THE SPOTLIGHT

On 20-21 October, the European Union (EU) Delegation held the fifth Uganda–EU Business Forum in Kampala with the Ministry of Energy and Mineral Development and the Private Sector Foundation Uganda. An EU Global Gateway event held alongside the Renewable Energy Conference and Expo, it sought European investment in renewables, notably hydropower and geothermal, through business meetings. A flagship project is rehabilitating the Nalubaale and Kiira hydropower plants (380 MW combined), backed by EUR 170M of Team Europe financing: EUR 30M in EU grants plus concessional loans from the European Investment Bank and the French Development Agency. It serves Uganda's 2040 target of over 52,000 MW installed. In 2025, Uganda's exports to the EU reached EUR 1.8B (official data), and Europe supplied nearly 79% of its foreign direct investment (about EUR 2.2B), the EU Ambassador said.

NUMBER OF THE MONTH

11th

Kenya's rank out of 139 economies for low-carbon energy use in the Global Innovation Index (GII) 2026, with 45.5% of its total energy supply coming from sources such as geothermal, hydro, wind, solar and biomass.

UGANDA LAUNCHES ITS NATIONAL ENERGY COMPACT, TARGETING 85% ELECTRICITY ACCESS BY 2030

Uganda launched its National Energy Compact on 22 October in Kampala, at the 11th Africa Energy Market Place co-organised by the Ministry of Energy and Mineral Development and the African Development Bank Group (AfDB). First presented in June 2026, the compact sets out Uganda's roadmap under Mission 300, the AfDB and World Bank initiative to connect 300 million additional Africans to electricity by 2030. By then, the compact targets 85% electricity access, 50% access to clean cooking, about 2,500 MW of operational capacity, 2,712 mini-grids and 500 to 650 MW of regional exports. A further 5,800 MW should reach financial close for commissioning after 2030. The compact seeks to mobilise USD 17.7B in investment, including USD 9.4B in private capital. A delivery and monitoring unit within the ministry will publish its first progress report in December 2026, according to the AfDB.

RENEWABLE ENERGIES

BURUNDI

A PPP DEAL TO PRIVATISE PART OF BURUNDI'S ELECTRICITY DISTRIBUTION NETWORK

On 15 October, Burundi signed a 25-year public-private partnership with Weza Power, a subsidiary of US-backed Anzana Electric Group. Weza Power will finance, build and operate the distribution network across roughly half the country. State utility REGIDESO retains the rest and transmission. According to Gridworks, an Anzana shareholder owned by British International Investment, this is the first nationwide private distribution concession in Africa in over 20 years. It includes 52,000 km of new or upgraded lines and 1.2M connections, aiming to raise grid access from 15% to over 50% by 2030 (rural access: around 2%). Financing will combine private and concessional funds, notably from the World Bank Group, the African Development Bank and the US International Development Finance Corporation, under Burundi's Mission 300 compact. Tariffs, the rollout timeline and each partner's financing share remain undisclosed.

MADAGASCAR

GEMCORP PARTNERS WITH SOVEREIGN WEALTH FUND TO RAISE UP TO USD 500M

In a statement on 6 October, UK investment firm Gemcorp Capital Limited announced that it had signed a partnership in New York with Madagascar's sovereign wealth fund (FSM) to raise up to USD 500M for strategic projects in the country. The agreement aims in particular to build the capacity of the FSM, which reports to the Presidency of the Refoundation, by giving it expertise in financial structuring and capital raising. According to Bloomberg, it also seeks to attract up to USD 5B from private investors and international partners over four years to fund priority sectors such as mining, energy, water and essential infrastructure. The FSM's targets include building three hydropower plants and solar PV units, and developing viable mining projects, notably in graphite, cobalt and rare earths.

RWANDA

CALL FOR INVESTORS FOR A 200 MW FLOATING SOLAR PLANT

Energy Development Corporation Limited (EDCL), a subsidiary of Rwanda Energy Group (REG), issued a prequalification call to independent power producers for a 200 MW floating solar plant on Lake Sake (Ngoma District), with 800 MWh of four-hour battery storage. Under the planned public-private partnership, the developer will build, operate and maintain the plant for 25 years under a power purchase agreement with EDCL. Bidders must prove financial capacity and experience building and running power plants. Joint-ventures are limited to two members. The project supports Rwanda's plans to expand power generation and diversify its energy mix; solar accounts for about 4.2% of installed capacity (REG). For investors, how the financing is structured and how reliably the state buyer pays will be key factors when assessing contract risk.

SUSTAINABLE CITY

KENYA

CMA CGM LAUNCHES A DEDICATED BLOCK TRAIN BETWEEN MOMBASA AND NAIROBI

On 28 October 2026, Kenya Railways, the Kenya Ports Authority (KPA) and the French group CMA CGM launched, in the presence of the French Ambassador and the Principal Secretary for Transport, a block train between Mombasa port and the Embakasi Inland Container Depot in Nairobi. A block train runs all its wagons to a single destination without splitting. The first train carried 108 twenty-foot equivalent units (TEU). The service should speed up container clearance at the port, complementing the nine to ten daily freight trains on the SGR and MGR, and ease access to Uganda, South Sudan, Burundi and the DRC. The launch follows on from the partnership that CMA CGM signed with the Kenyan government at the Africa Forward Summit in Nairobi in May 2026. Under that partnership, the group committed USD 800M to modernising and operating port terminals in Mombasa.

USD 160M PROGRAMME TO FUND CONSERVATION OVER TEN YEARS

On 21 October in Taita Taveta, the Kenyan government, The Nature Conservancy (TNC) and Enduring Earth launched Thamani Asili ("value of nature" in Kiswahili), a USD 160M Project Finance for Permanence (PFP). Philanthropic donors will provide USD 80M, matched by the State over ten years, moving conservation away from short-term funding. An independent trust fund will manage disbursements. The programme aims to conserve about 17.3M hectares, including 2.7M hectares of new community conserved areas, supporting Kenya's goal of protecting 30% of its land and waters. It covers four landscapes (Tsavo to Coastal, Greater Ewaso, Greater Rift to Western, Southern Kenya) and expects to benefit 1.6M people directly, create 7,800 direct and 15,000 indirect jobs in ecotourism, sustainable grazing and carbon projects, and avoid 7.5M tonnes of emissions by 2035. It is Africa's third PFP, after Namibia and Gabon.

MAURITIUS

EMERGENCY MEASURES AS WATER RESERVOIR LEVELS FALL

With drought taking hold, the Mauritian authorities have stepped up measures to secure the water supply. Mare-aux-Vacoas, the country's main natural reservoir, is only 36% full, compared with 88% a year ago. Water cuts lasting up to several days have sparked protests in the Plaines-Wilhems district since early October. On 9 October, the Cabinet decided to bring nine boreholes into service by the end of the month and to double the capacity of the pipeline linking Mare-Longue reservoir to La Marie treatment plant, bringing it to 30,000 m^3 a day. In addition, since 12 October, the Central Water Authority (CWA), the state water utility, has been requisitioning private boreholes under the 2024 water resources law. Households without storage equipment can also apply for up to MUR 15,000 (about EUR 280) in support from the Development Bank of Mauritius (DBM) to buy two water tanks and a pump.

UGANDA

CENTRAL BANK TEAMS UP WITH THE EIB TO BETTER MANAGE CLIMATE RISK

On 21 October, the Bank of Uganda (BoU) signed a cooperation agreement with EIB Global, the development arm of the European Investment Bank (EIB), to help Ugandan banks better identify, manage and disclose their climate-related risks. The technical assistance, funded by Germany and Luxembourg under the EIB's Greening Financial Systems programme, will help the central bank draw up a roadmap for a greener financial sector, improve transparency and reporting by banks, and roll out the national green taxonomy launched in 2025. Housing Finance Bank will be the first commercial bank to benefit. The aim is to help raise the USD 28.1B that Uganda estimates it needs for climate action by 2030. BoU Deputy Governor Augustus Nuwagaba stressed that building resilience should not come at the expense of access to credit. Uganda joins Kenya, Rwanda, Nigeria and Ethiopia as beneficiaries of the programme.

230 KV TRANSMISSION LINES AZEZO-DEBARK AND BURIE-INJIBARA

Ethiopian Electric Power (EEP) invites bids for the design, supply, installation and commissioning of two 230 kV double-circuit lines: about 85 km from Azezo to Debark and about 30 km from Burie to Injibara, serving the new Debark and Injibara substations. The contract is funded under the World Bank's USD 522.63M Power Sector Reform, Investment and Modernization in Ethiopia project (PRIME-1). Completion time: 730 days.

6 MWP SOLAR PV PLANT WITH 10 MWH BATTERY STORAGE IN KISMAYO

Somalia's Ministry of Energy and Water Resources (MoEWR) seeks a contractor to design, supply, install and commission a solar photovoltaic (PV) plant of at least 6 MWp, paired with a battery energy storage system (BESS) of at least 10 MWh, for the Wamo Energy Service Company (WESCO) in Kismayo, Jubaland. The plant is financed under the USD 150M Somali Electricity Sector Recovery Project (SESRP). Delivery: 12 months.

TYLLIUM

PRESENTATION OF CLUB MEMBERS

Thank you for presenting your company in the newsletter! Could you please introduce your company's activities, your sectors of operation, and your collaboration?

Founded in Paris, Tyllium is a French project developer and EPC (Engineering, Procurement and Construction) general contractor for infrastructure and industrial projects. With offices in France, and in Kenya, Tyllium focuses on Africa across few sectors: **healthcare, communication, agro-industrial and renewable energy infrastructures projects**. Our Nairobi-based team works with public authorities, financiers and local partners to take projects from structuring and financing through to design, delivery and handover.

Could you tell us about your flagship project and other references in the region?

Flagship project: Integrated Forest Fire Management for Kenya Forest Service
Financed by a loan from the French Treasury, Tyllium delivered on a turnkey basis, an integrated forest fire management system for the Kenya Forest Service (KFS). The project strengthens KFS's capacity to detect and respond to forest fires in three of Kenya's key water towers: **the Mau, the Aberdares and Mount Kenya, covering 14 counties**.
It comprised: (i) a turnkey VHF digital radio communication network; (ii) an early fire detection CCTV camera network; (iii) firefighting vehicles, equipment and accessories; (iv) capacity development through training on the new technology and firefighting tactics with French experts. Deployment covered more than 50 sites across the country and involved close coordination with Kenyan authorities and local subcontractors. The digital radio network's First Call ceremony was held in Nairobi on 26 November 2024, presided over by the Kenyan Cabinet Secretary for Environment, Climate Change and Forestry and the French Minister of State for Francophonie and International Partnerships. The project was delivered at the end of 2025. **We were honoured to welcome H.E. the Ambassador of France to the KFS site in Nakuru, and we thank KFS, the French Embassy and the French Treasury for their continued support.**

Other references in Africa:

- **Uganda –** Design, construction and equipping of the Regional Diagnostic and Oncology Center in Mbarara for the Uganda Cancer Institute, financed by a French Treasury loan; contract signed in Kampala in May 2026.
- **Ghana –** Eastern Regional Hospital (20,000 m²), financed by UK Export Finance and Standard Chartered Bank, executed by the joint venture Tyllium-Ellipse U.K. Ltd.
- **Kenya –** Supply and installation of data back-up servers and software for Kenya Pipeline Company
- **Cameroon –** Design and Build of 2 agro-industrial factories in Limbé area (under financial closing)

Do you have any advice to give to other club members, or information you would like to share?

- **Plan the administrative path from day one.** Government-to-government financed projects involve tax exemptions, import inspections and licensing; mapping these early protects the schedule.
- **Build with local partners.** Kenyan subcontractors and stakeholders bring site knowledge and help solve field challenges, such as site access in remote forest areas.
- **Design for the end user.** Involving the operating teams early supports adoption and long-term use of the assets.

ONGOING EVENT

On November 3rd and 4th, 2026, the French Chamber of Commerce in Kenya (FCCK) will host the 4th edition of French Week in Nairobi, followed by site visits on November 5th. Six months after the Africa Forward Summit brought the French-Kenyan business community together on an unprecedented scale, this edition aims to turn that momentum into concrete opportunities through high-level roundtables, hands-on workshops and dedicated networking.

Last year's edition brought together nearly 600 participants, 6 public officials and 85 speakers. This year's event will be officially opened by H.E. Wadid Benaabou, Ambassador of France to Kenya.

Agenda:

- **Day 1 – November 3rd: Connect & Power: Kenya's Infrastructure Backbone (Ports, Trade Corridors, Energy & Digital)**. Roundtables on French companies' role in East Africa's infrastructure pipeline, the future of energy and the grid in Kenya, the AI-readiness of Kenya's fibre backbone, and Kenya's electric vehicle market. The afternoon features workshops on navigating Kenyan institutions and cybersecurity (masterclass with Caspera.Lab), followed by the Mistral Accelerator Bootcamp Demo Day showcasing 6 startups (French Tech, Mistral, Qhala and Aedib).

- **Day 2 – November 4th: Build & Scale: Value Creation through Manufacturing, Agriculture and Rural Markets.** Roundtables on whether Kenya is capturing the value it should, success stories of industrial transformation, the investment climate ahead of the 2027 elections, and carbon credits under the new rulebook. Afternoon workshops cover scenario analysis ahead of the election cycle and rural markets as a lever for growth.

- **Day 3 – November 5th:** Site visits.

Location: Novotel Nairobi Westlands

UPCOMING EVENTS

Powerelec Kenya returns to the **Sarit Expo Centre in Nairobi** for three days **dedicated to solar, renewable energy, energy storage, e-mobility and power. Supported by the Kenya Renewable Energy Association (KEREA) and the Kenya National Chamber of Commerce and Industry (KNCCI),** the trade fair and conference brings together manufacturers, project developers, utilities and financiers from more than 40 countries.

The 2025 edition, held under the patronage of the Ministry of Energy and Petroleum and the Ministry of Investments, Trade and Industry, gathered over 100 international exhibitors, more than 4,000 trade visitors, 500 delegates and 50 expert speakers. This year, Alex Kamau Wachira, Principal Secretary for Energy, is expected as chief guest, alongside Dr (Eng.) Joseph Siror, Managing Director of Kenya Power.

Powerelec Kenya 2026 will feature:

- An exhibition with national pavilions from India, Korea, Turkey and Egypt
- Sessions on energy storage for commercial, industrial, rooftop and rural use
- A green finance session and a CEO forum for women in Kenya's energy sector
- A Utility Masters' Forum with the Geothermal Development Company (GDC), Kipeto Energy and the Energy and Petroleum Regulatory Authority (EPRA)
- A dedicated session on e-mobility in Kenya

Location: Sarit Expo Centre, Nairobi

Learn more: Powerelec Kenya

16th AFRICA PPP™
INFRASTRUCTURE FINANCE, INVESTMENT & PARTNERSHIP SUMMIT

Kenya, Nairobi, 11th to 13th November 2026

Hosted by the **Public Private Partnerships (PPP) Directorate of the Republic of Kenya** and organised by AME Trade, **the 16th edition of Africa PPP** brings Africa's infrastructure finance summit to Nairobi. Under the theme ***"Building Africa's Prosperity: Transformative Infrastructure, Investment and Partnerships to Accelerate Economic Development"*,** it will look at how to bring energy, transport, water and sanitation, and urban and social infrastructure projects to financial close.

The summit gathers ministers, investors, development finance institutions and private sector leaders. Confirmed speakers include **John Mbadi, Cabinet Secretary for the National Treasury, Eng. Kefa Seda, Director General of the PPP Directorate, and representatives of the International Finance Corporation (IFC), British International Investment (BII) and the Multilateral Investment Guarantee Agency (MIGA).** The French infrastructure investment firm Infra Gestion will also take part, with its Managing Director Pierre Rolland and Head of International Development Alicia Herrera Masurel.

Africa PPP 2026 will feature :

- A pre-conference training workshop on project preparation and structuring
- Pan-African project showcases
- A "Kenya in Focus" session on flagship and newly announced PPP projects in transport, energy and logistics
- Curated networking with investors and public decision-makers
- Post-event technical site visits

Location: JW Marriott Hotel, Chiromo Lane, Nairobi
Learn more: Africa PPP 2026

France, Paris, 24th and 25th November 2026

Held under the high patronage of Mr. Emmanuel Macron, President of the French Republic, and supported by the Ministry of Economy, Finance and Industry, as well as the Ministry for Europe and Foreign Affairs, the **2026 edition of Ambition Africa will bring together over 1,500 French and African participants**, both in person and online, representing up to 43 African countries.

On November 24th & 25th, 2026, the forum returns to the Ministry of Economy, Finance and Industry in Paris for its eighth edition. Now a key annual event for Franco-African economic and trade relations, it gathers ministers, ambassadors, prominent speakers and business delegations from across the African continent for two days of high-level dialogue and partnership.

Ambition Africa 2026 will feature:

- Official plenary sessions with French and African officials
- Sectoral and transversal workshops on agriculture, health, energy sovereignty, water and waste, cybersecurity, urban development, finance and creative industries
- An innovation contest and awards ceremony
- Personalized B2B meetings between French and African companies
- Networking cocktails and a closing dinner concert

Location: Paris, France

Learn more: Accueil - Ambition Africa

Kenya, Naivasha, 24th to 27th November 2026

The **Kenya Electricity Generating Company (KenGen)**, Africa's largest producer of clean and renewable energy, will host the **Sustainable Energy Conference (SEC) 2026** at Olkaria, home to Kenya's geothermal fields. Under the theme ***"Powering Africa's Green Industrial Revolution"*,** the conference aims to close the funding and development gap in Africa's sustainable energy sector and speed up the transition through investment and partnerships.

KenGen expects **more than 1,500 delegates from over 80 countries, including 200+ investors, 60+ policymakers and regulators, and 100+ utilities and power producers**. Financiers are expected to make up around 40% of attendees. The previous edition, held at Olkaria in September 2025, was where KenGen unveiled its 10-year plan to add 1,500 MW of capacity.

SEC 2026 will feature:

- Benchmarking sessions where African power producers present their performance, technologies and project pipelines
- Structured matchmaking between power producers and investors
- A Deal Room and investment forum for bankable projects nearing financial close
- A Carbon Trading & Green Adoption Pavilion for carbon credits and green offtake
- An exhibition with over 100 exhibitors

Location: Olkaria, Naivasha, Kenya

Learn more: [Sustainable Energy Conference 2026]

The Conference "Towards Sustainable and Resilient Cities" is organised by the Embassy of France in Kenya and the partners of the Renewable Energy & Sustainable Cities Club. It will bring together Kenyan government bodies, county and urban authorities, donors, international organisations, Kenyan and French companies, civil society and research institutes in Nairobi on Wednesday 2 December 2026, from 8:30 to 19:00.

The conference is part of the European and International Strategy of the French Ministry for Ecological Transition and builds on the commitments made at the Africa Forward Summit held in May 2026.

The conference aims to tackle the challenges raised by Kenya's rapid urbanisation. Around 30% of the country's 55 million inhabitants live in cities today, and that share is expected to reach 50 to 60% by 2050. Kenyan cities already generate nearly 70% of national GDP, yet more than 60% of Nairobi's urban population lives in informal settlements. The conference will examine how to finance and plan this growth at a time when concessional resources are becoming scarcer and Kenya's capacity for sovereign borrowing is constrained.

The Conference "Towards Sustainable and Resilient Cities" will feature round tables on :

- Accelerated urbanisation in Africa and the levers for sustainable, inclusive and low-carbon urban growth
- Financing the sustainable city by mobilising public and private capital and developing financial innovation
- Planning and governing the sustainable city, from the New Urban Agenda to the post-2030 SDGs
- Sustainable mobility to decongest Nairobi
- Building sustainable neighbourhoods, from Kenya's roadmap for low-carbon buildings to the French ÉcoQuartier (eco-district) approach

Attendance is by invitation. Organisations interested in taking part can contact toareia.guehennec@dgtresor.gouv.fr

Location : Nairobi, Kenya (venue to be confirmed)

Co-chaired by **H.E. William Ruto, President of the Republic of Kenya, the African Union Commission (AUC), the African Development Bank (AfDB), Norway, the United States and the International Energy Agency (IEA), the Summit on Clean Cooking in Africa** will bring together governments, industry leaders, investors, development partners and civil society **in Nairobi between 27-28 January 2027**. The summit was first planned for July 2026 and rescheduled. President Ruto announced the new dates at the United Nations General Assembly in September.

The Nairobi summit builds on the first edition, held in Paris in 2024, where governments and the private sector committed a historic USD 2.2B, of which USD 740M has since been deployed in 22 countries. This edition aims to secure new financial and political commitments to close the gap for the 1 billion Africans who still lack access to clean cooking.

The Summit on Clean Cooking in Africa will feature:

- High-level sessions with African heads of state, ministers and heads of international institutions
- New financial and political commitments from governments, development banks and the private sector
- A stocktake of progress since the 2024 Paris summit
- The presentation of Kenya's USD 600M clean cooking investment opportunity for schools, health facilities and prisons

Attendance is by invitation. Organisations interested in taking part can submit an expression of interest through the IEA.

Location: Nairobi, Kenya

Learn more: Summit on Clean Cooking in Africa
