

15 – 16 January 2019 | The Grand Hyatt, Mumbai

Flying for All

With hundreds of millions of people joining the global middle-class, the demand for air travel is witnessing an unforeseen upsurge. The International Civil Aviation Organization has predicted a 100 percent increase in global air travel by the year 2030, creating a need for extensive efforts to bring the entire aviation ecosystem to pace. To ride this strong tailwind of growth and pave the way forward for the sector, the Ministry of Civil Aviation, Government of India in collaboration with FICCI is organizing a Global Aviation Summit with an overarching theme of “Flying for all” on 15-16 January 2019 in Mumbai, the financial capital of India. The event is supported by ICAO, IATA, ACI and CANSO.

Objectives

The global aviation industry is in a high-growth trajectory, ushering an era of rapid expansion. Going forward, the biggest driver of demand will be the emerging economies, which will need to cater for air travel for the nearly 6 billion people. To commensurate this fast growth of the sector, the Global Aviation Summit provides an exclusive platform for collaborative efforts on a global magnitude. The Summit aims to focus on the celebration of ‘Flying for All’ and to provide a platform to the aviation fraternity to showcase the challenges of the sector in the newly developing growth spots and understand how the technology-driven innovations will change the air travel in future. The Summit also aims to be the most comprehensive platform for civil aviation, witnessing a vivid representation from the global aviation ecosystem entailing global leaders from airlines, manufacturers, investors, vendors, cargo, space industry, banking institutions, skill development agencies and states & UTs of India.

Expectations

Aviation is a key driver of economic growth as it facilitates the growth of businesses, trade and tourism, which significantly affects all sectors of the economy. With flying becoming more affordable and pervasive over the years, national ecosystems are evolving to meet these growth requirements. The platform will bring together prominent thought leaders from across the world to share their experiences on strengthening national aviation ecosystems. They will share success stories and learnings, emphasizing on principles that will apply across countries. Policymaking approaches that balance market forces with the public interest will be highlighted.

Prominent Transport Ministers from across the world will share their experiences on enhancing the Aviation ecosystem and put forth key analytical inputs on their success stories, experience and knowledge to develop aviation in their respective countries. Civil Aviation Authorities of the World will also discuss how to ensure that safety and security standards are maintained across a fast-growing and vast aviation ecosystem.

The event will focus on challenges and goals to transform the ambitious ‘Flying for All’ into a distinct reality. It will also examine the future of drones, sustainable growth of aviation, cargo and logistics in the aviation industry – all the factors behind building great aviation business. More than 1000 delegates from global Aviation fraternity are likely to participate in first of its kind Global Aviation summit 2019.
